NOTIFICATION

JACKSON SAFETY* R60 AIRMAX* Powered Air Purifying Respirator Units
(Product Codes 12993-02 and 13042-02)

URGENT – FOR IMMEDIATE ACTION – VOLUNTARY PRODUCT RECALL

Dear Sir/Madam,

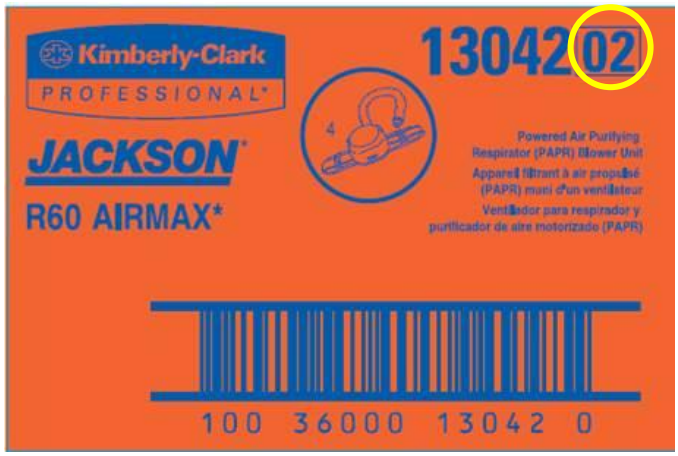
I am writing to notify you that Kimberly-Clark Professional has initiated a voluntary recall of the modified JACKSON SAFETY* R60 AIRMAX* Powered Air Purifying Respirator (PAPR) and associated Blower Unit (KCP codes 12993-02 and 13042-02) that were sold to you between July 2, 2015 and May 23, 2016. It has come to our attention that there is a potential product defect, and the 'Voluntary Recall Product' does not consistently meet the quality standards demanded by Kimberly-Clark. This voluntary recall is a precautionary measure. It is important to note there have been no injuries or illnesses reported because of this potential defect.

While using the 'Voluntary Recall Product', the user may experience a poor connection between the Battery and the Blower Unit causing the unit to not turn on or stop working during use without warning. The continuation of use of the 'Voluntary Recall Product' could potentially expose the user to the airborne particulates generated by the welding process.

Please take the following actions as a matter of urgency:

1. **Cease use** of the JACKSON SAFETY* R60 AIRMAX * PAPR and associated Blower Unit (12993-02 and 13042-02). All product codes can be found on the exterior packaging of the product or on the Blower Unit itself. (See images below)
2. **Contact Kimberly-Clark Professional Product Concerns Team** (1-888-346-4652) for replacement shipment and further instructions.
3. **Kimberly-Clark Professional will immediately replace all 'Voluntary Recall Product'** upon receipt of contact information and confirmation of your possession of the 'Voluntary Recall Product' with the superior JACKSON SAFETY* AIRMAX* ELITE PAPR at no cost to you.
4. **Ship all 'Voluntary Recall Product' and 'Associated Components' (if relevant)** back to Kimberly-Clark Professional at no cost to you.

To assist you in identifying the 'Voluntary Recall Product', please use photos below to locate product code numbers on the exterior packaging. Note that the dash code "02" is critical to identifying the affected product.



To assist you in identifying the 'Voluntary Recall Products', when packaging has been removed, please view the photograph below. A sticker identifying the lot number (e.g. XP5029####) can be found on the unit.

We are committed to managing this process as quickly as possible and apologize for any inconvenience this voluntary product recall may cause you and your business.

Thank you,

John R. Adams
Industrial Business Leader, North America
Kimberly-Clark Professional

Product List:

Product Code	'VOLUNTARY RECALL PRODUCTS'	Description
