Re: IMPORTANT NOTICE: EPA RCRA Code Update on SDS for 3M™ TB Quat Disinfectant RTU Cleaner

Dear 3M Customer,

At 3M, we take great care in developing quality products and solutions for our customers.

As you may be aware, the Resource Conservation and Recovery Act ("RCRA") is a U.S. federal law that regulates the management of hazardous and non-hazardous waste. We recently discovered the RCRA code was incorrect on the SDS for the 3M™ TB Quat Disinfectant (SKU 7100034339). Our records indicate you received product that was manufactured in the past.

If you need to dispose of unused product/expired product, continue to dispose of the product as specified on the label and on the updated SDS (DGN 24-9443-3 version 6, effective 3/23/2022). This revised SDS applies to all unused units that are still in your possession whether opened or unopened.

[For affected product that have already been sold to customers, you should notify your customers using the template notice attached to this notice and provide them with the updated SDS, where appropriate.](#)

We appreciate your cooperation on this matter and apologize for the inconvenience this may cause your organization and your customers. Please contact your local 3M sales representative if you have any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Thomas J Neu".
