

GOLD GAS[®]

PREMIUM SHIELDING GASES

The Gold Standard in Welding Performance.

Seven precision blends that increase weld quality, lower production costs and ultimately save you money. You'll find it with Airgas.

It's the smallest cost in your welding applications. Yet the right shielding gas can have the greatest impact on your total cost. At Airgas, we understand how shielding gases influence the quality of your weld, the productivity of your labor and the profitability of your business. Our welding process specialists, including certified welding inspectors, will help you determine which of our seven Airgas Gold Gas[®] mixes best fits your needs. And with nearly 800 Airgas locations nationwide, we can produce and distribute your Gold Gas, whether you have one facility across the street or many facilities across the nation. It's a unique combination of the right product and the right expertise—right where you need it.

Precisely formulated for specific applications and optimum results.

We have simplified the range of premium shielding gas mixes to meet the stringent requirements for all MIG, TIG, flux-cored and robotic applications. Only Airgas Gold Gas® shielding gases offer:

- *Fewer rejects*
- *Less spatter*
- *Less overweld*
- *Better welds in less time*
- *Less rework*
- *Less post-weld cleanup*

Of the three major cost components of any welding job: labor, wire and shielding gases, by far, shielding gases are the smallest cost. Yet, picking the right shielding gas can greatly influence the major cost factor in welding—labor time. Airgas Gold Gas can make a positive impact on your bottom line by improving welding productivity and quality.

Seven superior choices to improve welding performance:

- *SteelMIX® Extra for all steel applications*
- *SteelMIX® 3 ideal for thinner gauge steel*
- *SteelMIX® high-energy, two-component mix*
- *StainMIX™ 3 three-part mix for stainless steel*
- *StainMIX™ versatile, 2-component pulse gas*
- *StainMIX™ TIG for 300-grade Austenetic stainless TIG*
- *AluMIX™ for all aluminum applications*

Comprehensive solutions to help you manage your supply chain more effectively.

As the largest U.S. distributor in the industry, we provide your business with a proven method of increasing weld quality and efficiency. We'll help you select:

- *Ideal mixture*
- *Right equipment*
- *Wire and other consumables*
- *Safety products*
- *MRO supplies*

All it takes is a call to your local Airgas representative. Our welding process specialists and certified welding inspectors have years of experience with customers in all industry segments. That experience helps us better understand your business issues. And after conducting a complete process and cost analysis of your welding operations, our experience enables us to recommend cost-effective solutions that will benefit your business for years to come.

The right location. The right product. The right expertise.
