

MSDS - EYESALINE CONCENTRATE

FENDALL COMPANY
5 E. COLLEGE DRIVE
ARLINGTON HEIGHTS, ILLINOIS 60004
(708) 577-7400

I. Trade Name

EYESALINE CONCENTRATE

Synonyms

NONE

II. Hazardous Ingredients

Alkyl Dimethyl Benzyl Ammonium Chloride (Less than 0.5% w/v)

III. Physical Data

Boiling Point:	212° F	/	Specific Gravity:	ND
Vapor Pressure:	760 mm HG	/	Vapor Density:	ND
Solubility in Water:	100%	/	Evaporation Rate:	ND
Percent Volatile by Volume:	ND	/		

Appearance and Odor: Colorless Liquid with no discernable odor.

IV. Fire and Explosion Hazard Data

Nonflammable Aqueous Solution.

V. Health Hazard Information

Routes of Exposure:

Inhalation: Not Applicable.
Skin Contact: In some individuals skin irritation may occur.
Skin Absorption: Not Applicable.
Eye Contact: In some individuals eye irritation may occur.
Ingestion: Ingestion of large volumes may cause gastric irritation.

Emergency and First Aid Procedures:

Eye: Immediately flush with water and consult a physician.
Skin: Immediately flush with water and consult a physician.
Inhalation: Not Applicable.
Ingestion: Induce vomiting and observe the patient for gastric irritation.

MSDS - EYESALINE CONCENTRATE

Notes to Physician: Eyesaline Concentrate is a concentrated buffered and preserved aqueous sodium chloride solution which is intended to be diluted with 10 parts tap water to 1.0 part of Eyesaline Concentrate before usage. Correctly diluted Eyesaline Concentrate is intended to be used as an emergency eyewash flushing solution.
