

Medical gas piping, certification and more.

Airgas also is recognized nationwide for providing central gas supply systems. These services include Design & Consultation, System Evaluation, Air Quality Testing & Certification, Preventative Maintenance, Shut Down Services and Turnkey Installations.

Outlook® Managed Services Program for Hospitals

This integrated managed services program streamlines the supply chain for all products from Airgas and delivers total cost reduction across your entire enterprise. This is the customized answer you've been looking for. Efficient management of gas and safety products can translate into lower costs. Outlook can help you coordinate people, equipment and products in a synchronized effort that reduces cylinder balances, gas consumption and the time consuming paperwork that goes with procuring gases and safety products.

Total reassurance in everything you need from a medical gas supplier.
You'll find it with Airgas.

For more information visit us on the web at www.airgas.com or call 888-236-6427.

MEDICAL GASES AND EXPERTISE

Providing all the products, services and expertise you need for a total cost advantage

Your medical gas expert creating value everyday.
The one source for all your medical gas needs.
You'll find it with Airgas.

Airgas fields the largest customer care team in the industry, with the goal of making your business more efficient and profitable. It starts with an in-depth understanding of how you use gas, how you manage it and how we can apply our expertise to your specific applications to provide better service and better cost efficiencies. We're known for our wide range of products, national scope, and close, personal attention. Airgas supplies medical gases, bulk gases, safety products, and disaster preparedness kits. We also provide supply chain management services, piping certification, and design/installation. All this and more from one supplier.

AIRGAS

All the products you need. Where you need them. When you need them.

Airgas supplies every medical gas product, where, when and how you need them. We have the nation's largest integrated network of locations and delivery fleet with widest offering of medical and specialty gases in cylinder and bulk. Our expertise in inventory management, equipment operation and attentive customer service assures our customers they have made the right choice in a medical gas supplier.

- Airgas has the largest footprint of medical gas facilities in the United States
- Over 325 medical gas fill plants
- 600 employees to service our medical customers
- Airgas has the largest vehicle delivery fleet in the US

Tonometry Standards
Transcutaneous Monitor Standards

Walk-O₂-Bout®

The Airgas Walk-O₂-Bout family of products is an innovative solution to issues that first responders and healthcare practitioners face when providing respiratory care to patients. Walk-O₂-Bout lightweight cylinders with built in regulator, 50 psi DISS outlet and wide permanent handles make it easy to lift and carry anywhere.

Bulk Gas – Equipment, Design and Install

Airgas designs and installs complete bulk gas systems – from the bulk pad, through gas piping to the patient's room. As one of the largest suppliers of bulk gases – including bulk medical gases – we have unrivaled leverage in maintaining product availability at consistent, cost-effective prices. Our comprehensive national distribution system provides reliable, efficient delivery. It's all backed by our local network of technical experts.
