SAFETY DATA SHEET

Flammable Gas Mixture: 1,2-Butadiene / Acetylene / Ethane / Ethylene / Hydrogen

Section 1. Identification

GHS product identifier	: Flammable Gas Mixture: 1,2-Butadiene / Acetylene / Ethane / Ethylene / Hydrogen
Other means of identification	: Not available.
Product use	: Synthetic/Analytical chemistry.
SDS #	: 012576
Supplier's details	: Airgas USA, LLC and its affiliates 259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283 1-610-687-5253
Emergency telephone number (with hours of	: 1-866-734-3438

operation)

Section 2. Hazards identification

Classification of the substance or mixture (29 CFR 1910.1200). FLAMMABLE GASES - Category 1 GASES UNDER PRESSURE - Compressed gas SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) Category 3 GHS label elements FLAMMABLE GASES - Category 1 Hazard pictograms : i i Signal word : Hazard statements : Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation. May cause drowsiness and dizziness. Precautionary statements : General : Read and follow all Safety Data Sheets (SDS'S) before use. Read label before us Keep out of reach of children. If medical advice is needed, have product container label at hand. Close valve after each use and when empty. Use equipment rated cylinder pressure. Do not open valve unit connected to equipment of compatimatimaterials of construction. Approach suspected leak area with caution. Prevention : Never Put cylinders into unventilated areas of passenger vehicles. Keep away from heat, sparks, open flames and hot surfaces No smoking. Use only outdoors or in a wel ventilated place. Response : IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable breathing. Call a POISON CENTER or physician if you feel unwell. Leaking gas		
substance or mixture GASES UNDER PRESSURE - Compressed gas SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) Category 3 GHS label elements Hazard pictograms :	OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Hazard pictograms : isope iso		GASES UNDER PRESSURE - Compressed gas SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -
Kignal word : Danger Hazard statements : Extremely flammable gas. Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation. May displace oxygen and cause rapid suffocation. May cause drowsiness and dizziness. Precautionary statements : Read and follow all Safety Data Sheets (SDS'S) before use. Read label before us Keep out of reach of children. If medical advice is needed, have product container label at hand. Close valve after each use and when empty. Use equipment rated cylinder pressure. Do not open valve until connected to equipment of compati materials of construction. Approach suspected leak area with caution. Prevention : Never Put cylinders into unventilated areas of passenger vehicles. Keep away from heat, sparks, open flames and hot surfaces No smoking. Use only outdoors or i well-ventilated area. Avoid breathing gas. Use and store only outdoors or in a well ventilated place. Response : If INHALED: Remove victim to fresh air and keep at rest in a position comfortable breathing. Call a POISON CENTER or physician if you feel unwell. Leaking gas fid to do so.	GHS label elements	
Hazard statements : Extremely flammable gas. Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation. May cause drowsiness and dizziness. Precautionary statements : Read and follow all Safety Data Sheets (SDS'S) before use. Read label before us Keep out of reach of children. If medical advice is needed, have product container label at hand. Close valve after each use and when empty. Use equipment rated cylinder pressure. Do not open valve until connected to equipment of compati materials of construction. Approach suspected leak area with caution. Section 2. Hazards identification

Hazards not otherwise classified	: In addition to any other important health or physical hazards, this product may displace oxygen and cause rapid suffocation.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Storage	 Store locked up. Protect from sunlight. Protect from sunlight when ambient temperature exceeds 52°C/125°F. Store in a well-ventilated place.

Section 3. Composition/information on ingredients

Substance/mixture	: Mixture
Other means of	: Not available.
identification	

CAS number/other identifiers

CAS number	:	Not applicable.
Product code	1	012576

Ingredient name	%	CAS number
ethane	0.1 - 99	74-84-0
hydrogen	1 - 99	1333-74-0
ethylene	1 - 99	74-85-1
acetylene	0.0001 - 1	74-86-2
1,2-Butadiene	0.0001 - 1	590-19-2

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necess	ary first aid measures
Eye contact	 Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. To avoid the risk of static discharges and gas ignition, soak contaminated clothing thoroughly with water before removing it. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: As this product is a gas, refer to the inhalation section.
Most important sympt	oms/effects, acute and delayed
Potential acute healt	h effects
_	

Eye contact	: Contact with	h rapidly expanding gas i	may cause burns or	frostbite.	
Inhalation	: Can cause dizziness.	central nervous system (CNS) depression.	May cause drowsines	ss and

Section 4. First aid measures

Skin contact	: Contact with rapidly expanding gas may cause burns or frostbite.		
Frostbite	: Try to warm up the frozen tissues and seek medical attention.		
Ingestion	: Can cause central nervous system (CNS) depression. As this product is a gas, refer to the inhalation section.		
Over-exposure signs/symp	<u>otoms</u>		
Eye contact	: No specific data.		
Inhalation	: Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness		
Skin contact	: No specific data.		
Ingestion	: No specific data.		
Indication of immediate me	dical attention and special treatment needed, if necessary		
Indication of immediate me Notes to physician	 dical attention and special treatment needed, if necessary Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. 		
	: Treat symptomatically. Contact poison treatment specialist immediately if large		

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: Contains gas under pressure. Extremely flammable gas. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. If involved in fire, shut off flow immediately if it can be done without risk. If this is impossible, withdraw from area and allow fire to burn. Fight fire from protected location or maximum possible distance. Eliminate all ignition sources if safe to do so.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Date of issue/Date of revision	: 1/15/2015.	Date of previous issue	: 1/14/2015.	Version : 0.03	3/13
--------------------------------	---------------------	------------------------	--------------	----------------	------

Section 6. Accidental release measures

Personal precautions, protec	tive equipment and emergency procedures
For non-emergency personnel	: Accidental releases pose a serious fire or explosion hazard. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	: Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for co	ntainment and cleaning up
Small spill	: Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment.
Large spill	: Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Store locked up. Eliminate all ignition sources. Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Empty Airgas-owned pressure vessels should be returned to Airgas. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.
