

Safety Beyond Products

iMSafe™ on-site safety assessment

Our QSSP- and OSHA 30-certified safety specialists will:

- Perform a safety assessment of your worksite
- Identify safety hazards and potential violations
- Provide you with a detailed report documenting findings
- Suggest cost-effective strategies for improvement

Stay safe and improve compliance

Injuries on the job and safety violations cost companies millions of dollars each year. Keeping your team safe and helping you avoid costly fines are top priorities for Airgas, an Air Liquide company.

That's why we've invested in the capabilities of our safety team to continue taking safety beyond products. With QSSP- and OSHA 30-certified safety specialists, we are uniquely positioned to do more than just sell products. Our team works hand-in-hand with you to improve your internal safety program, reduce injuries and help keep you compliant with OSHA and industry regulations.

iMSafe™

On-site safety assessment

We offer a variety of surveys and inspections designed to help you improve safety in your workplace. Your Airgas safety specialist will work with you to identify the areas to evaluate based on discussions about your safety priorities.

Surveys and assessments

- Facility safety walk through
- Implementation
- Crib crawl
- Hand protection
- Efficiency calculator for PAPR and supplied-air applications

Inspections

- Fall protection equipment
- Eyewash and emergency showers
- Ladders

“What Airgas provided as a result of an iMSafe facility walk-through started a new safety culture at our company. Thanks to the help of Airgas, we passed our recent state safety inspection without a single violation. We are looking forward to continuing to work with Airgas to create a safer working environment.”

EHS Director, Custom Trailer Manufacturer

Evaluating your results

With an iMSafe on-site safety assessment, you get the information you need to improve safety for your business. After receiving your detailed report with our findings, we'll discuss the results and provide suggestions for improvement.

We'll also store your data so we can help you track important details about your safety program in a single location. Your safety specialist will create a record of your program and provide you with observations related to safety within your facility. It's a seamless way for Airgas to help you stay on track and keep your team safe.
