

Airgas Healthcare

an Air Liquide company

Focus on patient care

Gases, equipment and services for emergency medical services

- Avoid runout of medical gases
- Access customer service for quick and easy resolution
- Save time with streamlined bill pay, account and inventory management

Changing care. With you.

Running out of medical gases during patient care isn't an option for you. As a first responder, the community you serve depends on you to have the right tools to administer emergency healthcare services. With the additional tasks of managing emergency medical oxygen, nitrous oxide, and other supplies you need, while also maintaining your budget, you need a supplier that simplifies the process.

Airgas Healthcare can provide the medical gases, equipment and safety products and PPE you need, including gas expertise. In addition, quick access to customer service and a robust portfolio of digital tools helps you better manage your time—so you can focus on emergency patient care instead.

Focus on patient care instead

With gases, equipment and services for first responders

Our Offer

Airgas Healthcare's mission is to support our healthcare customers in your mission to improve lives. We offer a one-stop shop for medical gases including emergency oxygen and medical nitrous oxide, equipment and services for EMS teams throughout the US. Innovative cylinder valve technology, equipment and safety products help you safely manage your medical gas supply and maintain your schedule. Our large national footprint with local support helps ensure you have what you need and when you need it, so you can quickly administer emergency healthcare services on demand.

In addition to a full product portfolio, Airgas offers easy and quick access to customer service via your local healthcare specialist or Airgas Total Access®, at your local branch, or by logging into your account on Airgas.com.

Airgas also provides a comprehensive digital tool set via Airgas.com that gives you visibility to better manage your supply chain: from bill pay and invoicing to ordering gases and products, to inventory management to help forecast usage and reduce runouts.

With Airgas Healthcare, you get the products and services you need so you can focus on patient care instead.

WOB™

Innovative cylinder valve technology designed exclusively for safe, mobile medical applications. Our new EMS WOB cylinder conveniently fits right into the ambulance cylinder holder.

Ask us about WOB+™ – same great features plus FDA 510k cleared as MR Conditional.
