

AMMONIA PRODUCTS & SERVICES

**Reliable ammonia supply. Responsive service.
Uncompromising safety.**

**The right products. The right locations. The right expertise.
You'll find it all with Airgas Specialty Products.**

Partnering with Airgas Specialty Products gives you peace of mind for ammonia and for DeNOx, metal treatment, water treatment, chemical processing, and ammonia refrigerant applications. You can count on reliable delivery of pure anhydrous ammonia and aqua ammonia products with every delivery.

The Airgas best-in-class service includes:

- *Nationwide delivery, even on short notice and after hours*
- *Repairs, pump-outs, tank inspection and preventative maintenance for all ammonia applications*
- *Dedicated specialists who deliver your products and services. We even provide ammonia safety training delivered by our own experienced trainers who target programs to meet your facility's needs.*

Airgas Specialty Products. Your Total Ammonia Solution.™

Airgas Specialty Products Your Total Ammonia Solution.™

Don't risk a production slowdown, or worse, because of an ammonia supply issue. Depleted inventory, less-than-expected product quality, safety concerns, and inadequate customer service could mean lost time and lost revenue.

For peace of mind, partner with Airgas Specialty Products.

Supply

Ammonia supply is delivered in cylinders, truckloads, less-than truckloads, railcar, or other specialized containers.

Anhydrous Ammonia

Commercial and Premium Grade

Aqua Ammonia

19%, 29% and custom concentrations

Field Service

Technical Service

Consulting, troubleshooting, start-up assistance and the development of specialized applications or systems

Guaranteed Inventory

GAIN™, Guaranteed Ammonia Inventory, will ensure that your supply of ammonia never runs out, preventing emergency delivery charges or down time

Emergency Response

Assistance is available in the event of a leak, spill, or other ammonia emergency

Pump-outs

Storage tanks and refrigeration systems can be completely evacuated to allow safe replacement of valves, gauges, or other required repairs

Tank Repairs

We are equipped to handle any tank repair from a single valve change to a complete refurbishment with depressurization to a vacuum as an option

Temporary Storage

Anhydrous and aqua ammonia storage can be provided on a temporary basis

Inspection and Repair Service Agreements

Our annual service contracts are customized to meet your needs and may include inspection, maintenance and repair services for your ammonia system

Safety and Regulatory Products

Safe Ammonia Facilities Education

Get free basic ammonia awareness training for your facility

Ammonia Safety Seminars

On-site training customized to meet your needs

Non-destructive Testing

Monitor your receiver, tank and pipes for corrosion with an NDT protocol

Risk Management/Process Safety

Satisfy your EPA and OSHA requirements with our traditional or web-based service

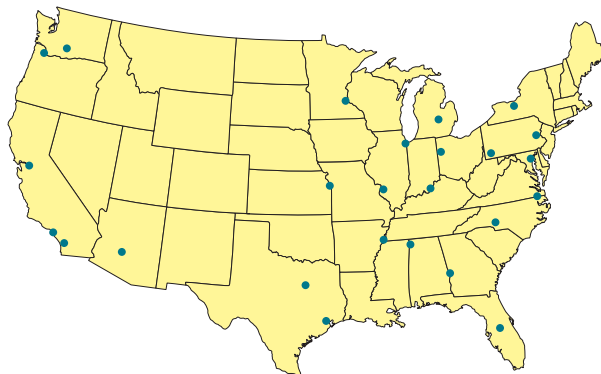

Equipment and Storage Systems

Equipment

Ammonia related equipment such as valves, regulators and gauges

Storage System Design and Installation

Design, engineering and installation of ammonia systems can include unloading stations, tanks, pumps, compressors and other components. Operation, maintenance and repair services are available

Airgas delivers the ammonia supplies, safety and service vital to your business in the U.S. and Canada.
