## Honeywell Industrial First Aid Steel Stations

- Kits have a full range of items needed at job sites, taking into consideration the first aid supplies that meet their specific needs
- Type 1 First Aid Kits are water, corrosion and impact resistant
- Wall mounted for easy access
- Class B kits include a broader range and quantity of supplies to deal with injuries encountered in more populated, complex and/or high-risk workplaces.
- Great for warehouses, large retail outlets, construction sites and manufacturing facilities
- ANSI/ISEA Z308.1-2015 compliant

Howard Leight™ TrustFit(TM) Pod earplugs are designed with an ergonomic stem, and dimpled foam tip so they are easy to fully insert and remove without picking up dirt from workers’ fingers, and comfortable to wear during the work day.

The 3M™ One Touch™ Pro Ear Plugs dispenser offers convenient access to workers on the move. A simple twist accurately and consistently dispenses one earplug at a time. The reusable free-standing or wall hanging dispenser can be re-stocked with One Touch™ refills of our most popular 3M™ E-A-R™ Earplugs.

Scotchgard™ Anti-Fog Coating lasts longer than traditional anti-fog coatings,* helping to increase eyewear performance in wet and steamy environments.

- Workers may enjoy reliable, clearer sight longer, because the coating, with its active ingredient, is bonded to the lens
- The coating retains its effectiveness for at least 25 washings, allowing workers to wear their eyewear longer
- The coating can be disinfected with diluted bleach soaking or alcohol wipes without losing its anti-fog performance
- Workers can feel confident wearing Scotchgard™ Anti-Fog coated eyewear because it meets the requirements of ANSI Z87.1 and CSA Z94.3 for limited impact

*Based on 3M internal testing per EN168 test method when compared with traditional anti-fog coatings.

3M™ Solus™ 1000 Series Safety Eyewear

- Scotchgard™ Anti-Fog Coating
- Padded, removable temples for added comfort

Respiratory Protection/ Ventilation Blower

3M™ Organic Vapor Service Life Indicator Cartridges
6000i Series

Incorporate a revolutionary end-of-service-life indicator (esli) technology to help answer the question that every respirator user must answer – “When should I change my cartridge?”.

• The 3M™ service life indicator can help provide added peace of mind as a complement to your current change-out schedule, and in some cases replace your current practices
• This technology can help increase compliance with your company’s respiratory policy and industry requirements
• These cartridges are NIOSH approved as 6001i and 60921i organic vapor cartridges against certain organic gases and vapors, plus they have all of the features you would find in standard 3M™ organic vapor cartridges

Optimize Cartridge Use

• It’s design to indicate service life based on individual exposure and respiratory use patterns

Engage your workforce in safety

• This simple, visual tool can help users determine when to change cartridges

<table>

</tr>
</tbody>
</table>

How the 3M™ Service Life Indicator works

3M™ Organic Vapor Cartridges 6001i and 60921i contain the 3M™ Service Life Indicator, a visual ESLI for certain organic vapors and exposure levels. The ESLI is located inside the cartridge, next to the activated carbon. As organic vapors travel through the cartridge, they are also absorbed into the ESLI. The clear cartridge wall allows you to monitor the developing indicator bar. When the cartridge is exposed to specific vapor concentrations, you will notice a change in the indicator.

When used properly in appropriate environments, an indicator bar will develop to help determine the remaining cartridge service life.

Allegro® 26” Axial Ventilation Blower

• Offers a high powered 2 hp, 115/230v ac, 60 Hz, single phase, thermally protected motor for applications requiring a maximum amount of output
• Offers the highest cfm output of any of our blowers (9570/8610/7750)
• Glass reinforced polypropylene (ppg) three blade fan with aluminum hub
• Complete unit epoxy powder coated in “safety orange”
• Interchangeable flange for intake/exhaust side mounting
• 16 Gauge cold rolled steel housing
• ¾” (1.76cm) Motor base
• Bolted motor mount construction
• Integrated carrying handles
• Steel/zinc plated grill
• Equipped with four rubber feet
• On/off switch box mounted to chassis

3M™ Speedglas™ Auto-Darkening Filter 9100XXi

The 3M™ Speedglas™ Welding Helmet 9100 with Auto Darkening Filter 9100XXi offers the largest viewing area in our 3M™ Speedglas™ product line. But with improved optics, the 9100XXi ADF allows you to see colors in a more realistic and natural state, which can help welders complete certain jobs with greater precision.

- Improved optics allows welders to see more realistic colors
- The 9100XXi silver front panel houses external controls, enabling fast and easy access to the grinding and memory modes
- Grab and go with auto-on allows welders to work quickly
- An improved user interface that is easy to understand
- Two memory modes that allow welders to set individual settings for dark shade, light-to-dark switching sensitivity, and dark-to-light delay
- External grinding mode activation
- Meets ANSI Z87.1 standard for limited impact
- Welding cap, carry bag, and starter kit included

Complete welding helmet systems – with 3M™ Speedglas™ Welding Filter Kit 9100XXi

See the difference!

Improved optics in the New 3M™ Speedglas™ Welding Filter 9100XXi provide more contrast and natural-looking color, as shown by these photos.

Shipping, handling and other itemized charges may apply in addition to advertised prices.

You’ll find it with us at airgas.com
The revolutionary LIFTech™ load distribution system features an adjustable “spine” that lifts the weight off of your shoulders and transfers it to the base of your torso. Tests resulted in a reduction of forces on shoulders up to 85% compared to a leading competitor harness. That means more comfort and productivity with less fatigue all day long.

The ExoFit STRATA™ redistributes the weight from pressure points on your shoulders and spreads it out to the base of your hips, helping reduce soreness and fatigue.

Front Snap D-Ring
The front D-ring snaps into a vertical position for use with fall arrest or vertical systems. When not in use, it easily stores flat against the chest strap to keep it stowed and out of the way.

E-Z-Link™ Quick SRL Adapter
The E-Z-Link™ quick SRL adapter lets you quickly attach personal self retracting lifelines into a durable connection point, while keeping your dorsal D-ring available. That means no more messing around with your webbing to connect SRLs. It reduces connection and disconnection time up to 80% compared to competitive hardnesses.

Lanyard Keepers
The highly durable breakaway lanyard keepers automatically reset when hooks are pulled out. They’re conveniently designed to be adjusted to any position or replacement along the webbing.

ExoFit STRATA™ Construction Style Positioning Harness. Aluminum back and side D-rings, tongue buckle leg straps with sewn in hip pad and belt

ExoFit STRATA™ Construction Style Positioning Harness. Aluminum back and side D-rings, locking quick-connect buckles with sewn in hip pad and belt

HEAVY ON FEATURES. LIGHT ON YOUR BACK.
Sealed-Block™ Self Retracting Lifeline
SRL with Magnetic Retraction Control (MRC) 50 ft. (15m) of 3⁄16" (5mm) 316 stainless steel wire rope with swivel snap hook, stainless steel carabiner and magnetic retraction.
- Utilizes magnetic eddy current technology to reduce retraction speed by 3X, greatly reducing the potential for lock-up during uncontrolled retraction
- Slower retraction speed reduces risk of damage to the paint on a ladder when the lifeline is accidently released
- Super corrosion resistant housing for added protection against caustic environments
- 316SS Wire rope for added protection in corrosive environments

FAST-LINE™ ALLOWS EASY REPLACEMENT OF STAINLESS CABLE
- Trained users can replace cable in the field
- Reduce downtime and costs

FLEXIGUARD™ TRAILER MOUNT SYSTEM: ENSURES MAXIMUM SAFETY, AND PEACE OF MIND AT ALL OF YOUR SITES.
DOT rated for highway use.
System needs to be lowered and locked during transport
Rated for two users — 310 lb (140 kg) each
Total working coverage for two users is approximately 16’ (4.88m)
System designed for a 6’ (1.8m) working surface from the ground
Equipped with two shock absorbing arms (Patent Pending)
Adjustable anchor height range from 10’–21.5’ (3m–6.6m)
Stand alone design so the weight of a vehicle is not required for fall protection use
Crank handle to raise and lower mast. Integrated brake locks mast in place
Integrated counterweight (concrete included)

Flexiguard™ Trailer
The Flexiguard™ DOT Rated Trailer Mount System is a portable overhead safety system that can be easily moved between job sites at posted highway speeds.
- DOT rated for highway use. System needs to be lowered and locked during transport
- Equipped with two shock absorbing arms (Patent Pending)
- Total working coverage for two users is approximately 16 ft. (4.88 m)
- System designed for a 6 ft. (1.8 m) working surface from the ground
- Adjustable anchor height range from 10 ft. – 21.5 ft. (3m – 6.6m)
- Standalone design so the weight of a vehicle is not required for fall protection use
- Crank handle to raise and lower mast
- Integrated brake locks mast in place
- 3 in. (76mm) Lunette Ring for Pintle Hitch
- 7,000 lbs. Rated stabilizing jacks
- Includes tail and brake lights for use on highway (DOT rated)
- Colored indicators show when both fully extended and retracted
- Self-Retracting Lifeline approved for use with system: D623504433
- Integrated counterweight (concrete included)
- Compliant to OSHA 1926.502 (d) (15), ANSI 1259.6

Shipping, handling and other itemized charges may apply in addition to advertised prices.
MSA Gravity® Suspension Harness

- Eight adjustment points for perfect sizing and fit
- Fold back hip D-rings that allow users to reduce possible snag hazards
- Gravity Suspension versions available with comfort shoulder padding
- Tool loops with internal rigid supports to make connection of tools easier
- Eight adjustment points for perfect sizing and fit
- Bayonet style buckles available with locking engagement window to confirm secure connection
- Carabiner with 3,600 lb (16kN) gate strength
- D-rings available at Ventral (waist), Sternal, Hip and Back locations
- Fall arrest rated Sternal and Back D-ring
- Waist pad with dual layer construction to reduce pressure during suspension
- D-rings available at Ventral (waist), Sternal, Hip and Back locations
- Elastic web keepers provide flexibility to manage excess webbing
- Quick adjusting buckles allow one hand tightening and loosening
- All versions include waist and leg padding to improve suspension comfort
- Assisted-rescue ring allows for remote access and deployment of the SELF+RSQ device in the event a user is incapacitated
- Color-coded and reflective elements direct user’s eyes and provide greater visibility, even in dark situations
- Descent device and rope spool are sealed to prevent water-exposure and component lockup in below-freezing environments
- Patented EZ-Link™ D-ring simplifies lanyard and personal self-retracting lifeline connection
- Easily connects to your current harness!

D623320001 | 100’ Detachable Self-Rescue™ System | 650.00

MSA Latchways® Personal Rescue Device (PRD®)

- Pre-assembled with integrated harness allowing for personal rescue
- In the event of a fall, PRD harness suspends the user and then allows a gentle lowering in a controlled descent
- Harness is lightweight and unobtrusive yet robust
- PRD components fit neatly into a “backpack”
- Highly durable polycarbonate, clear casing which allows for easy visual inspection of the critical internal components

Airgas New Products Guide

Honeywell Miller DuraSeal™ Self-Retracting Lifeline

Designed to lower your cost of ownership by keeping it in the field
- Prevents contaminants from entering the unit with highest industry rated sealed technology IP69K
- Built to last reusable brake design withstands multiple falls
- Quick, low cost repair is achieved with field replaceable lifetime
- Reduces fatigue and increases productivity with units up to 30% lighter than competitive sealed units
- Product service life is extended in the harshest environments with corrosion resistant components

Streamlight 3AA ProPolymer® Dualie®

See what’s ahead of you and right in front of your feet with the intrinsically safe 3AA ProPolymer Dualie®. Its bright light, which shines both ahead of you and downward, helps you avoid slips, trips and falls.
- Features two C4® LEDs and three lighting modes: spot, flood, spot and flood simultaneously
  - Spot: 140 lumens; 7,300 candela; 171m beam; runs 18 hours
  - Smooth parabolic reflector provides tight beam with optimum peripheral illumination
  - Flood: 140 lumens; 80 candela; 18m beam; runs 18 hours
  - Flood beam produces a soft, wide beam to illuminate your work area

Spot/Flood combo: 245 lumens; runs nine hours

Streamlight Siege® AA ULTRA-COMPACT, ALKALINE HAND LANTERN with Magnetic Base

A rugged, compact lantern for when you need a lot of light without it taking up a lot of space. The Siege® AA uses affordable, easy-to-find AA alkaline batteries to provide 360° of soft, even light that illuminates a large area.

Multiple modes:
- White LED (one C4® LED) with cover removed:
  - High for brightest light: 200 lumens; runs seven hours
  - Medium for bright light and longer run times: 100 lumens; runs 15.5 hours
  - Low provides extended run times for when less light is needed: 50 lumens; runs 37 hours Red LED (two red LEDs)
  - Red LED High (night vision preserving mode): 0.7 lumens; runs 192 hours (8 days)
  - Flash SOS mode for emergency signaling: 0.7 lumens; runs 288 hours (12 days)

Streamlight 3AA ProPolymer® Dualie® Laser

The first intrinsically safe flashlight featuring a red laser pointer. Along with a focused spot beam, you can see what’s ahead of you and illuminate your work area, as well as identify and pinpoint objects at a distance.
- Dualie Laser model features one C4® LED and a 640nm - 650nm red laser and three lighting modes: spot, laser, spot and laser simultaneously
  - LED: 150 lumens; 7,700 candela; 175m beam; runs 17 hours
  - Smooth parabolic reflector provides tight beam with optimum peripheral illumination
  - Laser: <5mW output power; Class 3R laser; runs 70 hours
  - Laser for identifying or targeting objects at a distance;

LED/Laser combo: runs 12 hours

Which Gases Will You Need to Monitor?

**Ventis™ Pro Series Multi-Gas Monitors**

**BE READY FOR THE MOMENT**

In your line of work, a day on the job can turn from habit to hazard in a single moment. Be ready for anything with the Ventis™ Pro Series Multi-Gas Monitors.

- Guaranteed for Life™ warranty*
- Flexible sensor configurations detect up to five gases
- Simplify gas detection and focus on taking action in emergency situations with custom alarm action messages like “EVACUATE” or “VENTILATE”
- Man-down alarm and dedicated panic button
- User and site tracking with iAssign™ Technology
- Compatible with most Ventis™ MX4 accessories

**FAST FACTS**
- Contemporary shell design with 4 large areas for custom logo imprinting or other personalization options
- 3-level height adjustment (Low, Medium, High) for greater stability, balance and retention
- Slots for cap-mounted earmuffs, face shields and other PPE accessories
- Ergonomic headband for easy adjustment to 3 different sizes (S, M/L and XL)
- Approved to be worn in the reverse position
- Moisture-wicking, breathable sweatband; easily removable, washable and replaceable
- Short brim and low-profile design for increased field of vision and user mobility

**Quick-Fit (Pin-Lock) Suspension**

**Ratchet Suspension**

**Additional colors available!**

Shipping, handling and other itemized charges may apply in addition to advertised prices.

FR Niru® Cushion-Ease®
Solid ¾” Thick
- Fire retardant rubber antifatigue mat great for welding environments
- 100% Nitrile Fire Retardant rubber compound
- Slip resistance to welding spatter
- Allows most cart traffic
- Optional M.D Ramp System
- Modular design that is easy to snap together

Description: Niru® Cushion-Ease® Solid Fire Retardant is made with a 100% Nitrile rubber compound providing unmatched durability and performance in harsh wet environments where caustic chemicals, cutting fluids, animal fats, oils, and greases are often found. A solid top construction offers additional anti-fatigue relief, and is easy to clean. Easy to snap together mats are compatible with NoTrax FR M.D. Ramp System for on-site custom configurations.

Matting

Dura 490 Trax™ and 990 Dura Trax™ Grande™
- NEW Nitrile blend rubber top surface works in welding environments
- 600° Hot nut test — no ignition, barely any smoke
- Sloped beveled edges to reduce trip hazards
- UniFusion™ bond guaranteed for the life of the mat
- RedStop™ non-slip backing to eliminate mat slippage

Dura Trax™ is a high-performance anti-fatigue floor mat offering the ultimate in comfort and durability for today's industrial environments. Dura Trax™ combines a noticeably softer rubber top surface with a dense sponge backing material using the Notrax® exclusive UniFusion™ bonding process. Dura Trax™ comes in a ¾” (490) or a full 1” (990) thickness that allows you to select your level of comfort.

APPLICATIONS: Extremely well suited for multi-shift operations in dry work areas; workstations, assembly lines, withstands exposure to sparks in welding applications.

Part Number  Thickness  Color  Size  Price
S57490S0023YB  9⁄16”  Black/Yellow  2’ x 3’  92.40
S57490S0035YB  9⁄16”  Black/Yellow  3’ x 5’  231.00

S579490S0035YB  1”  Black/Yellow  3’ x 7’5”  4,279.50

Also available in all black. Additional sizes 2’ & 4’ wide rolls, length 75’. Cuts 2’, 3’, 4’, length 75’

482 Bubble Trax™ ½” Thick and 982 Bubble Trax Grande™ 1” Thick
- Bubble top surface provides the ultimate in ergonomic comfort and durability
- Long-lasting vinyl top surface
- Dense closed cell foam base
- RedStop™ non-slip backing to eliminate mat slippage
- Manufactured with UniFusion™ a unique technology that eliminates product de-lamination
- Sloped beveled edges to reduce trip hazards and allows easy access onto and off of mat
- Available in ½” and 1” thicknesses
- Custom lengths available (2’,3’, 4’ and 5’ widths)

Sure-Grip® EX Hazardous Material Safety Cabinets

Self-Closing Doors
Required on all Hazardous Material Cabinets, the encased self-close mechanism provides obstruction-free access to top shelf space. Self-indexing doors close in sequence to ensure a tight closure from top to bottom.

U-LOC™ Door Handle
Flush-mount Sure-Grip® handle comes with installed cylinder lock and key set. Accepts optional padlocks for added security.

Haz-Alert® Reflective Labeling
Firefighter friendly warning labels reflect with high visibility when illuminated with a flashlight. As required by code, cabinet must be labeled “Hazardous — Keep Fire Away”

Application Specific Labels
Choose from a packet of 10 chemical specific labels, and apply to indicate contents of the cabinet. Cabinets are FM, NFPA 400, NFPA 1, and International Fire Code Compliant

EN Safety Cabinets
- Fire-resistant design protects volatile contents for 30 minutes (JTR22603) or 90 minutes (JTR22607), allows increased evacuation time and gives emergency responders additional critical minutes for controlling the fire before it reaches flammable contents, greatly reducing the spread and severity of the fire
- Innovative hybrid-style door(s) open/close manually, and automatically self-close under fire conditions
- Ventilation system accepts an exhaust air pipe or recirculating air filter to control fumes
- Unique removable sump with perforated insert funnels spills from shelves and ensures containers never sit in spilled liquid
- Bright interior color provides greater visibility to containers — minimizes mistakes in container selection
- EN, OSHA, NFPA, FM, and MPA Dresden approved

Flexible spill containment for leakproof protection that sets up quickly and folds easily for portable storage.

JBC™ T-Cap Caution Tape Adapter
- 100% Recyclable
- Manufactured in the USA
- Save money, storage and manpower
- Fits all JBC cones

Tired of Your Traditional Absorbents Not Performing in the Rain?

Introducing Spilltration™ Oil Spill Cleanup Products for Wet Weather

Spilltration products capture oil and allow water to filter through

Spilltration basin under diesel leak.

Spilltration™ Benefits:
- Takes Up 4X Less Space
- Deploys Faster
- Saves Time
- Saves Money
- Prevents Fines
- Protects the Environment

Recommended Uses:
- Hydraulic Fluids
- Transmission Fluids
- Diesel
- Motor Oils
- Lubricants
- Other Hydrocarbons

SPILLTRATION BASINS: Place under vehicles, machinery and tools to collect and contain oil leaks and spills from spreading.

Up to 80% of all oil-based spills (hydraulics, motor oil, diesel fuel) happen during inclement weather. And, an oil spill on wet ground spreads faster than a cheetah on crack. Unfortunately, traditional oil cleanup socks and pads function at only 20% to 25% efficiency in the rain and take up 500% too much space for dry storage.

Spilltration Products
Absorb Oil. Filters Clean Water.
Not Just Another Sorbent Product

Spilltration materials are manufactured to work best in wet weather by absorbing oils and allowing clean water to filter through. Spilltration rugs, strips and basins work up to 10 times faster and take up 5x less space than traditional sorbents.

SPILLTRATION™ Products Are…

Smooshable
Easy to Deploy
Made for Outdoor Use

SPILLTRATION PRODUCTS ARE PROUDLY MANUFACTURED IN THE USA FROM RECYCLED MATERIALS
