Airgas provides the right products and reliable service today's nuclear power industry needs to meet tight deadlines and even tighter documentation. As an ASME Certified distributor of ferrous and non-ferrous welding and brazing materials, we maintain a vast supply of qualified filler materials for nuclear facility use. We provide thorough quality assurance documentation and adhere to nuclear industry quality standards and regulations.

Airgas is qualified by the American Society of Mechanical Engineers (ASME), and accredited under ASME Quality System Certificate QSC-608.
Qualified welding materials

With Airgas you'll find the leading brands of products certified for the nuclear power industry. Lincoln, ESAB, and Sandvik are among the accredited manufacturers of the materials we supply.

All Airgas inventory of filler metals for the nuclear power industry is tested to the ASME Section III, Division 1, Subsection NCA 3800 for Class 1 components, as well as ASME Section II, Part C, and applicable SFA specifications.

Airgas meets ASME and U.S. Military specifications for the supply of welding filler materials used in nuclear power applications.

- ASME Quality System Certification (QSC 608)
- ASME Sect III Div 1 NCA 3800
- 10 CFR Part 50 Appendix B
- 10 CFR Part 21
- ASME NQA-1 applicable sections
- ANSI-N45.2
- MIL-I 45208 (Note: Mil Specs are not used in nuclear applications)

You benefit from product, process, regulation, and supply chain expertise.

With decades of experience serving the power-generation industry, there’s no better single-source solution than Airgas. As the country’s leading supplier of gases, welding, and safety products — including ASME Certified welding filler materials — you’re assured of getting the right products for use with the right processes while adhering to nuclear power industry regulations. You’re also assured of delivery through one of the most efficient supply chains available.

Airgas: The ONE total solution provider.

- ASME Certified supplier of welding filler materials
- Complete onsite material warehousing and management
- AWS Certified shielding, welding, and cutting gases, including cylinders, MicroBulk and liquid bulk delivery modes.
- Regulators and gas delivery equipment
- Welding supplies and equipment
- Safety products
- Oilind Safety equipment rental and servicing, safety training, monitoring services
- Power tools and industrial supplies
- Centrally stocked inventory in six Airgas distribution centers with next-day delivery
