Walk-O₂-Bout+™

Mobile cylinder solutions for medical gases

- Improve patient safety
- Simplify gas administration for the caregiver
- Ensure continuity of gas supply while reducing waste

Always there to simplify gas management

The Walk-O₂-Bout+ (WOB+™) family of products from Airgas Healthcare provides an innovative solution to problems that first responders and healthcare practitioners face when providing respiratory care to their patients in times of calm and crisis.

Each WOB+ mobile gas cylinder includes innovative valve technology in one integrated, easy-to-use unit that is FDA 510k cleared as MR Conditional. In addition, these mobile gas cylinders help simplify gas management and reduce gas waste.

WOB+ mobile medical gases are perfect for the following healthcare settings:

- Dental practices
- Emergency Medical Services (EMS)
- Hospitals
- Medical practices
- Nursing homes
- Surgery centers

Walk-O₂-Bout+™

Mobile medical gases

Increase patient safety

- Hospitals feel confident knowing they are meeting regulatory compliance with product that has been FDA 510k cleared
- Caregivers can trust that WOB+™ is FDA 510k cleared as MR Conditional—every cylinder they select meets their requirements and minimizes the risk of a non-compliant cylinder in the MR environment
- With leading-edge DISS connection capability that outputs 200 lpm, WOB+ meets many ventilator requirements

Simplify caregiving

- The integrated valve and regulator assembly means caregivers no longer waste time hooking up a regulator
- The durable and soft handle permits caregivers to comfortably carry the cylinder
- A large knob with an arrow indicator on top indicates flow direction and helps caregivers easily turn on the cylinder to a precise flow rate
- Caregivers can trust that WOB+ helps ensure continuity of gas supply while reducing waste—with our easy to read gauge, you always know how much gas you have left

Barbed outlet with 0–25 lpm flow range

Gauge with heavy-duty protection

Ergonomic handle

50 psi DISS outlet delivering up to 200 lpm

FDA 510k cleared as MR Conditional

Integrated valve and regulator

WOB+ is available for medical-grade oxygen, medical-grade air and HELIOX

Always *There*
