

SAFETY SERVICES

Preserving Life One Person at a Time

Experience. Diversification. Fully Integrated Programs.

Manage risk and control safety-related costs by partnering with Airgas On-Site Safety Services. We combine the latest advances in safety technology and equipment with a strong history of hands-on industry experience. Our integrated safety disciplines, training matrix and compliance management, and customer-centric implementation of safety programs are an integral part of our customers' operating efficiency.

Our goal is to assist you with the safe completion of your projects on a timely basis. Airgas On-Site Safety Services begins with a comprehensive overview of your project operations requiring safety initiatives. Safety professionals are committed to helping owners, contractors and service companies improve and carry out safety policies and objectives.

The resources and expertise to keep your workers safe. You'll find it with Airgas On-Site Safety Services.

Fully Integrated Safety Services reduce costs, save time.

The depth of Airgas On-Site Safety Services' experienced personnel and the wide variety of safety equipment we provide help us meet virtually any safety need our customers require. Airgas On-Site Safety Services' single-source capabilities, including equipment maintenance and repair, help you reduce costs and save valuable time in the process. We provide a wide range of safety services including:

Airgas On-Site Safety Services also provides a complete **Mobile Service Center** for on-site full-service breathing apparatus maintenance and cylinder hydro testing. There's no need to waste valuable time servicing equipment off-site.

- Thorough on-site cylinder testing facility.
- Avoid taking 5- and 30-minute air packs to large testing facilities and not getting them back quickly or at all.
- Cylinders stay on-site, drastically reducing out-of-service time and completely eliminating cylinder transportation concerns.
- Respiratory integrity reduces need for extra or back-up cylinders.

- Safety supervision/red hat teams
- Safety training/confined space training
- Incident reporting and investigation
- Safety/loss prevention and loss control management
- 2- and 3-man standby rescue teams
- Safety audits and inspections
- Safety plan development and implementation
- Instrumentation repair and calibration
- Equipment maintenance and repair

Professional H₂S Services helps save lives.

Deadly H₂S gas, also known as Sour Gas or hydrogen sulfide, is found in many hydrocarbon reservoirs and petrochemical processing environments. It can cause injury or death in concentrations as small as 100ppm. Every worker that could become exposed to H₂S needs to know how to recognize its presence, how to protect against its effects and how to rescue and administer first aid should someone be overcome by it.

Airgas On-Site Safety Services' valuable experience providing H₂S safety solutions includes:

- H₂S awareness training
- Preplanning and site specific contingency plans
- Pulmonary Function Testing (PFTs)
- Respirator renting/fit-testing including:
 - Gas monitors
 - Grade "D" and "L" breathing air
 - Compliance inspection services

Safety...and much more.

With an expansive national footprint and an extensive product line, industrial construction specialist expertise, Red-D-Arc® welding rental equipment, complete industrial gas resources and safety training programs, Airgas On-Site Safety Services provides the complete management solutions for all your on-site safety, maintenance, welding and gas supply needs.

Engineering the right solutions for all your safety and turnaround needs.
