

FALL PROTECTION SERVICES

Preserving Life One Person at a Time

The Right Experience. The Right Equipment. The Right Solutions.

Airgas On-Site Safety Services gets it right.

We've been providing the right fall protection solutions for over 40 years. From offshore wind farms and oil rig platforms, to petrochemical, industrial, power generation and mining operations, we have both the equipment and the training expertise to protect your most valuable assets — your people. Whether it's *fall arrest, suspension, positioning/restraint, or retrieval*, we do what it takes to keep your personnel safe and on the job.

You shouldn't have to choose between productivity and safety. With Airgas On-Site Safety Services, you can rest easy knowing that your fall protection issues will be handled professionally — while you concentrate on your productivity.

Airgas On-Site Safety Services delivers the resources and expertise of Airgas added to the Oilind Safety heritage that you trust.

Top-of-the-Line Equipment that fits your application.

® All of our equipment is top-of-the-line DBI-Sala® gear — available for rent, purchase, or lease. Each harness, every retractable lanyard, tripod, clip, anchor, and fall protection product is visually inspected by our certified safety gear technicians to assure nothing goes out the door that isn't up to OSHA specifications and Airgas On-Site Safety Services' rigorous standards. We also offer expert repair services to keep your equipment in top condition.

Airgas On-Site Safety Services provides a wide range of fall protection equipment for applications that include:

- General maintenance operations
- Oil and gas rig platforms (rig-up and rig-down services)
- Shut downs and confined space
- Auxiliary support through more than 1,100 Airgas locations nationwide

Expert Support Services help reduce accidents.

Airgas On-Site Safety Services is your source for expert training and consulting services. We'll help you select the right equipment for your worksite — including specialized equipment for confined space entry and retrieval. And, we'll work with our manufacturers to design and deliver the ideal program for your application protection system.

To make sure equipment is used properly, Airgas On-Site Safety Services' safety coordinators will monitor daily usage and offer guidance to your employees. In addition, we offer formal fall protection training to help you meet OSHA requirements.

Detailed Inspections and Inventory Control protect your investment.

Working with the DBI-Sala i-Safe™ Intelligent Safety System, Airgas On-Site Safety Services maximizes the effectiveness and minimizes the total cost of your safety program through intelligent, web-enabled technology, including:

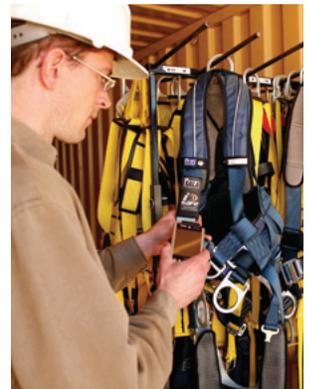

- Up-to-date inspection logs for product reliability and safety
- Verification system to promote compliance
- Electronic record for traceability and audit
- Inventory tracking for every job site
- Paperless and accurate asset management
- Easy retrieval of information for inventory control
- Theft and diversion prevention
- Real-time website support for consultative safety solutions
- Instant access to key information for streamlined logistics and safety management
- Accountability by logging product and inspection status by job

Safety...and much more.

With an expansive national footprint, an extensive product line, industrial construction specialist expertise, Red-D-Arc® welding equipment rental, complete industrial gas resources, and safety training programs, Airgas On-Site Safety Services provides the complete solution for all your on-site safety, MRO and gas supply needs.

Engineering the right solutions for all your safety and turnaround needs.
