

Conveniently find previously ordered products with Airgas.com!

Here at Airgas, we realize that our customers often order many different products and contracted items. We have a 'My Items' feature on Airgas.com to help find these products.

What part numbers can I enter? You can either use an Airgas part number or your Customer part number.

Should I remove any spaces in the part number? Please use the full part number including any spaces.

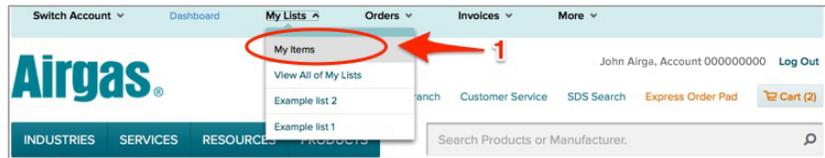

Can I edit or remove products from this list? No, this list shows all products that you have previously ordered or contracted.

How often does this list update? In general, the list will update one to two business days after an order, or change to contract items.

Why are there no products shown? Products will only be shown if you have either placed an order or have contracted items.

Why can't I add a product to my cart? Check the availability on the product, if the product is unavailable then you will not be able to add it.

What if I need further help? A video explaining how to use 'My Items' is available on Airgas.com. Click on 'Resources' at the top of the screen then on 'Tutorials' in the center of the screen.

How to use the My Items list:

- Login to Airgas.com
- On the toolbar select 'My Lists' then 'My Items'
- A list of products is shown. The list includes all products purchased in previous orders and all contracted items
- The list can be searched by using the search bar. Simply enter the product name, part number or manufacturer and press enter or click magnifying glass
- You can also filter the products by using the dropdown to select 'Contract Items', 'Sales History' or 'View All'
- Click the 'Add to Cart' button to add the product
