

### Conveniently find previously ordered products with Airgas.com!

Here at Airgas, we realize that our customers often order many different products and contracted items. We have a 'My Items' feature on Airgas.com to help find these products.

**What part numbers can I enter?** You can either use an Airgas part number or your Customer part number.

**Should I remove any spaces in the part number?** Please use the full part number including any spaces.

**Can I edit or remove products from this list?** No, this list shows all products that you have previously ordered or contracted.

**How often does this list update?** In general, the list will update one to two business days after an order, or change to contract items.

**Why are there no products shown?** Products will only be shown if you have either placed an order or have contracted items.

**Why can't I add a product to my cart?** Check the availability on the product, if the product is unavailable then you will not be able to add it.

**What if I need further help?** A video explaining how to use 'My Items' is available on Airgas.com. Click on 'Resources' at the top of the screen then on 'Tutorials' in the center of the screen.

**You may also contact our technical team at [eservice@airgas.com](mailto:eservice@airgas.com)** or call 1.866.935.3370 to speak to a representative.

#### How to use the My Items list:

- Login to Airgas.com
- On the toolbar select 'My Lists' then 'My Items'
- A list of products is shown. The list includes all products purchased in previous orders and all contracted items
- The list can be searched by using the search bar. Simply enter the product name, part number or manufacturer and press enter or click magnifying glass
- You can also filter the products by using the dropdown to select 'Contract Items', 'Sales History' or 'View All'
- Click the 'Add to Cart' button to add the product
