# **SAFETY DATA SHEET**

n-Hexane

### Section 1. Identification

| GHS product identifier        | : n-Hexane  |
|-------------------------------|---|
| Chemical name                 | : n-hexane  |
| Other means of identification | <ul> <li>hexane; normal-Hexane; Hexyl hydride; Normal hexane; n-Hexylhydride; n-<br/>Caproylhydride; Hexane, normale; NSC 68472; n-HEXANE, conc. (3) 5%; hexane, n-;<br/>Hexane (n-Hexane)</li> </ul> |
| Product type                  | : Liquid.   |
| Product use                   | : Synthetic/Analytical chemistry.   |
| Synonym                       | <ul> <li>hexane; normal-Hexane; Hexyl hydride; Normal hexane; n-Hexylhydride; n-<br/>Caproylhydride; Hexane, normale; NSC 68472; n-HEXANE, conc. (3) 5%; hexane, n-;<br/>Hexane (n-Hexane)</li> </ul> |
| SDS #                         | : 001060  |
| Supplier's details            | : Airgas USA, LLC and its affiliates<br>259 North Radnor-Chester Road<br>Suite 100<br>Radnor, PA 19087-5283<br>1-610-687-5253   |
| 24-hour telephone             | : 1-866-734-3438  |

### Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).  |
|--|--|
| Classification of the substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 2<br/>TOXIC TO REPRODUCTION - Category 2<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -<br/>Category 3<br/>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2<br/>AQUATIC HAZARD (LONG-TERM) - Category 2</li> </ul> |
| GHS label elements                         |  |
| Hazard pictograms                          |  |
| Signal word                                | : Danger   |
| Hazard statements                          | <ul> <li>Highly flammable liquid and vapor.<br/>May cause drowsiness or dizziness.<br/>Suspected of damaging fertility or the unborn child.<br/>May cause damage to organs through prolonged or repeated exposure.<br/>Toxic to aquatic life with long lasting effects.</li> </ul>                 |

 May form explosive mixtures with air.

 Precautionary statements

 General
 : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.

 Prevention
 : Obtain special instructions before use. Wear protective gloves. Wear protective clothing. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Do not breathe vapor.

 Response
 : Collect spillage. Call a POISON CENTER or doctor if you feel unwell. IF exposed or concerned: Get medical advice or attention.

| Date of issue/Date of revision | : 2/22/2021 | Date of previous issue | : 12/22/2017 | Version : 2 | 1/12 |
|--------------------------------|-------------|------------------------|--------------|-------------|------|
|--------------------------------|-------------|------------------------|--------------|-------------|------|

### Section 2. Hazards identification

| Storage                          | : Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.                      |
|----------------------------------|---|
| Disposal                         | : Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazards not otherwise classified | : None known.   |

### Section 3. Composition/information on ingredients

| Substance/mixture             | : Substance   |
|-------------------------------|---|
| Chemical name                 | : n-hexane  |
| Other means of identification | <ul> <li>hexane; normal-Hexane; Hexyl hydride; Normal hexane; n-Hexylhydride; n-<br/>Caproylhydride; Hexane, normale; NSC 68472; n-HEXANE, conc. (3) 5%; hexane, n-;<br/>Hexane (n-Hexane)</li> </ul> |
| Product code                  | : 001060  |

### **CAS number/other identifiers**

| CAS number      | : 110-54-3 |     |            |
|-----------------|------------|-----|------------|
| Ingredient name |            | %   | CAS number |
| n-hexane        |            | 100 | 110-54-3   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessa |  |
|------------------------|--|
| Eye contact            | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention following exposure or if feeling unwell.</li> </ul>  |
| Inhalation             | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact           | : Wash contaminated skin with soap and water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion              | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

| Potential acute health eff     | ects        |                                 |              |             |      |
|--------------------------------|-------------|---------------------------------|--------------|-------------|------|
| Eye contact                    | : No knowr  | n significant effects or critic | al hazards.  |             |      |
| Date of issue/Date of revision | : 2/22/2021 | Date of previous issue          | : 12/22/2017 | Version : 2 | 2/12 |

## Section 4. First aid measures

| Inhalation                 | <ul> <li>Can cause central nervous system (CNS) depression. May cause drowsiness or<br/>dizziness.</li> </ul>  |
|----------------------------|--|
| Skin contact               | : No known significant effects or critical hazards.  |
| Frostbite                  | : Try to warm up the frozen tissues and seek medical attention.  |
| Ingestion                  | : Can cause central nervous system (CNS) depression.   |
| Over-exposure signs/sym    | <u>otoms</u>   |
| Eye contact                | : No specific data.  |
| Inhalation                 | : Adverse symptoms may include the following:, nausea or vomiting, headache,<br>drowsiness/fatigue, dizziness/vertigo, unconsciousness, reduced fetal weight, increase<br>in fetal deaths, skeletal malformations  |
| Skin contact               | <ul> <li>Adverse symptoms may include the following:, reduced fetal weight, increase in fetal<br/>deaths, skeletal malformations</li> </ul>  |
| Ingestion                  | : Adverse symptoms may include the following:, reduced fetal weight, increase in fetal deaths, skeletal malformations  |
| Indication of immediate me | dical attention and special treatment needed, if necessary   |
| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>  |
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with the<br>risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along<br>the ground. Vapors may accumulate in low or confined areas or travel a considerable<br>distance to a source of ignition and flash back. This material is toxic to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

## Section 6. Accidental release measures

| Personal precautions, protec   | ive equipment and emergency procedures   |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.  |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities. Collect spillage.  |
| Methods and materials for co   | ntainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

| Precautions for safe handlin                                       | g   |   |  |   |   |                                    |
|--|---|---|--|---|---|------------------------------------|
| Protective measures  | on skin o<br>when ver<br>adequate<br>against e<br>Empty co<br>containe<br>closed w<br>open flar<br>lighting a<br>exposure | propriate personal protect<br>or clothing. Use only with a<br>ntilation is inadequate. Do<br>ely ventilated. Use only nor<br>electrostatic discharges. Av<br>ontainers retain product res<br>r or an approved alternative<br>hen not in use. ## Section 8. Exposure controls/personal protection

### **Control parameters**

### **Occupational exposure limits**

| Ingredient name                  | Exposure limits  |
|----------------------------------|--|
| n-hexane                         | ACGIH TLV (United States, 3/2019).<br>Absorbed through skin.<br>TWA: 50 ppm 8 hours.<br>NIOSH REL (United States, 10/2016).<br>TWA: 180 mg/m <sup>3</sup> 10 hours.<br>TWA: 50 ppm 10 hours.<br>OSHA PEL (United States, 5/2018).<br>TWA: 1800 mg/m <sup>3</sup> 8 hours.<br>TWA: 500 ppm 8 hours.<br>OSHA PEL 1989 (United States, 3/1989).<br>TWA: 180 mg/m <sup>3</sup> 8 hours.<br>TWA: 50 ppm 8 hours.  |
| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measur     | <u>}s</u>  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
| Date of issue/Date of revision   | 2/22/2021 Date of previous issue : 12/22/2017 Version : 2 5/12   |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.   |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidizing materials  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.   |

Date of issue/Date of revision

### Section 10. Stability and reactivity

### Hazardous polymerization

: Under normal conditions of storage and use, hazardous polymerization will not occur.

### Section 11. Toxicological information

### Information on toxicological effects

Date of issue/Date of revision

### Section 12. Ecological information

Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 16. Other information

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

### Section 16. Other information

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
