# **SAFETY DATA SHEET**

Phosgene

# Section 1. Identification

GHS product identifier	: Phosgene
Chemical name	: phosgene
Other means of identification	<ul> <li>carbonyl chloride; Carbonic dichloride; Phosgene (Carbonyl chloride); Chloroformyl chloride; Carbonyl dichloride; Carbon oxychloride; Diphosgene; Dichloroformaldehyde; Carbon dichloride oxide; CG; Phosgene Gas</li> </ul>
Product type	: Gas.
Product use	: Synthetic/Analytical chemistry.
Synonym	<ul> <li>carbonyl chloride; Carbonic dichloride; Phosgene (Carbonyl chloride); Chloroformyl chloride; Carbonyl dichloride; Carbon oxychloride; Diphosgene; Dichloroformaldehyde; Carbon dichloride oxide; CG; Phosgene Gas</li> </ul>
SDS #	: 001139
Supplier's details	: Airgas USA, LLC and its affiliates 259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283 1-610-687-5253
24-hour telephone	: 1-866-734-3438

# Section 2. Hazards identification

OSHA/HCS status	is material is considered hazardous by the OSHA Hazard Communio 9 CFR 1910.1200).	cation Standard
Classification of the substance or mixture	ASES UNDER PRESSURE - Compressed gas CUTE TOXICITY (inhalation) - Category 1 (IN CORROSION - Category 1 ERIOUS EYE DAMAGE - Category 1	
GHS label elements		
Hazard pictograms		
Signal word	anger	
Hazard statements	ontains gas under pressure; may explode if heated. Ital if inhaled. auses severe skin burns and eye damage.	
Precautionary statements		
General	ead and follow all Safety Data Sheets (SDS'S) before use. Read labe eep out of reach of children. If medical advice is needed, have produ- bel at hand. Close valve after each use and when empty. Use equip linder pressure. Do not open valve until connected to equipment pre se a back flow preventative device in the piping. Use only equipment aterials of construction.	ict container or ment rated for pared for use.
Prevention	ear protective gloves. Wear eye or face protection. Wear protective spiratory protection. Use only outdoors or in a well-ventilated area. I is. Wash hands thoroughly after handling.	

## Section 2. Hazards identification

# Section 3. Composition/information on ingredients

Substance/mixture	: Substance
Chemical name	: phosgene
Other means of identification	<ul> <li>carbonyl chloride; Carbonic dichloride; Phosgene (Carbonyl chloride); Chloroformyl chloride; Carbonyl dichloride; Carbon oxychloride; Diphosgene; Dichloroformaldehyde; Carbon dichloride oxide; CG; Phosgene Gas</li> </ul>
Product code	: 001139

### **CAS number/other identifiers**

CAS number	: 75-44-5		
Ingredient name		%	CAS number
phosgene		100	75-44-5

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

### **Description of necessary first aid measures**

Eye contact	: Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.
Inhalation	: Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Skin contact	: Get medical attention immediately. Call a poison center or physician. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: As this product is a gas, refer to the inhalation section.

# Section 4. First aid measures

Most important symptoms/effects, acute and delayed					
Potential acute health effe	<u>ets</u>				
Eye contact	: Causes serious eye damage. Contact with rapidly expanding gas may cause burns or frostbite.				
Inhalation	: Fatal if inhaled.				
Skin contact	: Causes severe burns. Contact with rapidly expanding gas may cause burns or frostbite.				
Frostbite	: Try to warm up the frozen tissues and seek medical attention.				
Ingestion	: As this product is a gas, refer to the inhalation section.				
Over-exposure signs/symp	o <u>toms</u>				
Eye contact	: Adverse symptoms may include the following:, pain, watering, redness				
Inhalation	: No specific data.				
Skin contact	: Adverse symptoms may include the following:, pain or irritation, redness, blistering may occur				
Ingestion	: Adverse symptoms may include the following:, stomach pains				
Indication of immediate me	dical attention and special treatment needed, if necessary				
Notes to physician	<ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>				
Specific treatments	: No specific treatment.				
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.				

### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

J	
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide halogenated compounds carbonyl halides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

3/12

# Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures				
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not breathe gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.		
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".		
Environmental precautions	:	Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).		
Methods and materials for co	nt	ainment and cleaning up		

Small spill	: Immediately contact emergency personnel. Stop leak if without risk.
Large spill	: Immediately contact emergency personnel. Stop leak if without risk. Note: see Section
	1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

Precautions for safe handling	1	
Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Do not get in eyes or on skin or clothing. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement. Empty containers retain product residue and can be hazardous. Do not breathe gas.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F). Store locked up. Keep container tightly closed and sealed until ready for use. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls/personal protection

### **Control parameters**

#### **Occupational exposure limits**

Ingredient name			Exposure limits		
phosgene			TWA: 0.4 mg/ TWA: 0.1 ppm <b>NIOSH REL (U</b> CEIL: 0.8 mg/r CEIL: 0.2 ppm TWA: 0.4 mg/ TWA: 0.1 ppm	<ul> <li>a 8 hours.</li> <li>nited States, 10/2016).</li> <li>m<sup>3</sup> 15 minutes.</li> <li>a 15 minutes.</li> <li>m<sup>3</sup> 10 hours.</li> <li>a 10 hours.</li> <li>bited States, 6/2016).</li> <li>m<sup>3</sup> 8 hours.</li> </ul>	
ate of issue/Date of revision	: 12/13/2019	Date of previous issue	: 2/22/2016	Version : 0.02	4/12

# Section 8. Exposure controls/personal protection

	<b>OSHA PEL 1989 (United States, 3/1989).</b> TWA: 0.4 mg/m³ 8 hours. TWA: 0.1 ppm 8 hours.

controls	other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection meas	<u>ures</u>
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

# Section 9. Physical and chemical properties

Date of issue/Date of revision	: 12/13/2019	Date of previous issue	: 2/22/2016	Version	:0.02	5/12
