Individual Protection Measures, Such as Personal Protective Equipment

**GENERAL PROTECTIVE AND HYGIENIC MEASURES:** The usual precautionary measures for handling chemicals should be followed.

**BREATHING EQUIPMENT:** Not required.

**PROTECTION OF HANDS:** The glove material has to be impermeable and resistant to the product/ the substance/the preparation. Selection of the glove material depends on consideration of the penetration times, rates of diffusion and the degradation.

**MATERIAL OF GLOVES:** The selection of the suitable glove does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

**EYE PROTECTION:** Goggles recommended during refilling.
