

# SAFETY DATA SHEET

# **1. PRODUCT AND COMPANY IDENTIFICATION**

Product Name: Excalibur® 308/308L-17 Product Size: 1/8 in.

#### Other means of identification

SDS number: 20000000500

#### Recommended use and restriction on use

**Recommended use:** SMAW (Shielded Metal Arc Welding) **Restrictions on use:** Not known. Read this SDS before using this product.

#### Manufacturer/Importer/Supplier/Distributor Information

#### Manufacturer/Supplier:

The Lincoln Electric Company 22801 Saint Clair Avenue Cleveland, Ohio 44117 USA Phone: +1 (216) 481-8100

The Lincoln Electric Company of Canada LP 179 Wicksteed Avenue Toronto, Ontario M4G 2B9 CANADA Phone: +1 (416) 421-2600

#### Safety Data Sheet Questions: SDS@lincolnelectric.com

#### Arc Welding Safety Information: www.lincolnelectric.com/safety

#### 24-Hour Emergency Response Telephone Numbers:

Area	Telephone
USA/Canada/Mexico	+1 (888) 609-1762
Americas/Europe	+1 (216) 383-8962
Asia Pacific	+1 (216) 383-8966
Middle East/Africa	+1 (216) 383-8969

#### 3E Company Access Code: 333988

#### 2. HAZARDS IDENTIFICATION

Classified according to the criteria of the Globally Harmonized System of Classification and Labeling of Chemicals (GHS), OSHA Hazard Communication Standard (29 CFR 1910.1200) and the Canadian Controlled Products Regulations.

## Hazard Classification

Not classified as hazardous according to applicable GHS hazard classification criteria.

## Label Elements

Hazard Symbol:	No symbol
Signal Word:	No signal word.
Hazard Statement	Not applicable
Precautionary Statement	Not applicable
Other hazards which do not result in GHS classification:	Electrical Shock can kill. If welding must be performed in damp locations or with wet clothing, on metal structures or when in cramped positions such as sitting, kneeling or lying, or if there is a high risk of unavoidable or accidental contact with work piece, use the following equipment: Semiautomatic DC Welder, DC Manual (Stick) Welder, or AC Welder with Reduced Voltage Control.
	Arc rays can injure eyes and burn skin. Welding arc and sparks can ignite combustibles and flammable materials. Overexposure to welding fumes and gases can be hazardous. Read and understand the manufacturer's instructions, Safety Data Sheets and the precautionary labels before using this product. Refer to Section 8.
Substance(s) formed under the conditions of use:	• The welding fume produced from this welding electrode may contain the following constituent(s) and/or their complex metallic oxides as well as solid particles or other constituents from the consumables, base metal, or base metal coating not listed below:

Chemical Identity	CAS-No.
Carbon dioxide	124-38-9
Carbon monoxide	630-08-0
Nitrogen dioxide	10102-44-0
Ozone	10028-15-6
Manganese	7439-96-5
Chromium (VI)	18540-29-9
Nickel	7440-02-0
Chromium oxide	1308-38-9
Fluorides (as F)	16984-48-8

# 3. COMPOSITION / INFORMATION ON INGREDIENTS

#### **Reportable Hazardous Ingredients**

Chemical Identity	CAS number	Content in percent (%)*
Iron	7439-89-6	40 - 70%
Chromium and chromium alloys or compounds (as Cr)	7440-47-3	15 - 40%
Titanium dioxide	13463-67-7	10 - 30%
Nickel	7440-02-0	5 - 10%
Feldspar	68476-25-5	5 - 10%
Limestone	1317-65-3	1 - 5%
Potassium silicate	1312-76-1	1 - 5%
Manganese	7439-96-5	1 - 5%
Quartz	14808-60-7	1 - 5%
Fluorides (as F)	16984-48-8	0.5 - 5%
Sodium silicate	1344-09-8	0.5 - 5%
Kaolin	1332-58-7	0.5 - 5%
Hydroxyethyl cellulose	9004-62-0	0.1 - 1%
Hectorite	12173-47-6	0.1 - 1%
Silicon	7440-21-3	0.1 - 1%
Iron oxide	1309-37-1	0.1 - 1%
Copper and/or copper alloys and compounds (as Cu)	7440-50-8	0.1 - 1%
Molybdenum	7439-98-7	0.1 - 1%
Zircon	14940-68-2	0.1 - 1%
Aluminum oxide	1344-28-1	0.1 - 1%

\* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

## **Composition Comments:**

The term "Hazardous Ingredients" should be interpreted as a term defined in Hazard Communication standards and does not necessarily imply the existence of a welding hazard. The product may contain additional nonhazardous ingredients or may form additional compounds under the condition of use. Refer to Sections 2 and 8 for more information.

4. FIRST AID MEASURE	S	
Ingestion:	Unlikely due to form of product, except for granular materials. Avoid hand, clothing, food, and drink contact with metal fume or powder which can cause ingestion of particulate during hand to mouth activities such as drinking, eating, smoking, etc. If ingested, do not induce vomiting. Contact a poison control center. Unless the poison control center advises otherwise, wash out mouth thoroughly with water. If symptoms develop, seek medical attention at once.	
Inhalation:	Move to fresh air if breathing is difficult. If breathing has stopped, perform artificial respiration and obtain medical assistance at once.	
Skin Contact:	Remove contaminated clothing and wash the skin thoroughly with soap and water. For reddened or blistered skin, or thermal burns, obtain medical assistance at once.	
Eye contact:	Dust or fume from this product should be flushed from the eyes with copious amounts of clean, tepid water until transported to an emergency medical facility. Do not allow victim to rub or keep eyes tightly closed. Obtain medical assistance at once.	
	Arc rays can injure eyes. If exposed to arc rays, move victim to dark room, remove contact lenses as necessary for treatment, cover eyes with a padded dressing and rest. Obtain medical assistance if symptoms persist.	
Most important symptoms	s/effects, acute and delayed	
Symptoms:	Short-term (acute) overexposure to welding fumes may result in discomfort such as metal fume fever, dizziness, nausea, or dryness or irritation of nose, throat, or eyes. May aggravate pre-existing respiratory problems (e.g. asthma, emphysema). Long-term (chronic) overexposure to welding fumes can lead to siderosis (iron deposits in lung), central nervous system effects, bronchitis and other pulmonary effects. Refer to Section 11 for more information.	
Hazards:	Welding hazards are complex and may include physical and health hazards such as but not limited to electric shock, physical strains, radiation burns (eye flash), thermal burns due to hot metal or spatter and potential health effects of overexposure to welding fume or dust. Refer to Section 11 for more information.	
Indication of immediate medical attention and special treatment needed		
Treatment:	Treat symptomatically.	

# 5. FIRE-FIGHTING MEASURES

General Fire Hazards:	As shipped, this product is nonflammable. However, welding arc and sparks can ignite combustibles and flammable products. Read and understand American National Standard Z49.1, "Safety In Welding, Cutting and Allied Processes" and National Fire Protection Association NFPA 51B, "Standard for Fire Prevention During Welding, Cutting and Other Hot Work" before using this product.
Suitable (and unsuitable) extingu	iishing media
Suitable extinguishing media:	As shipped, the product will not burn. In case of fire in the surroundings: use appropriate extinguishing agent.
Unsuitable extinguishing media:	None known.
Specific hazards arising from the chemical:	Welding arc and sparks can ignite combustibles and flammable products.
Special protective equipment an	d precautions for firefighters
Special fire fighting procedures:	Use standard firefighting procedures and consider the hazards of other involved materials.
Special protective equipment for fire-fighters:	Selection of respiratory protection for fire fighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

# 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	If airborne dust and/or fume is present, use adequate engineering controls and, if needed, personal protection to prevent overexposure. Refer to recommendations in Section 8.
Methods and material for containment and cleaning up	Clean up spills immediately, observing precautions in the personal protective equipment in Section 8. Avoid generating dust. Prevent product from entering any drains, sewers or water sources. Refer to Section 13 for proper disposal.
Environmental Precautions:	Avoid release to the environment. Prevent further leakage or spillage if safe to do so.

# 7. HANDLING AND STORAGE

Precautions for safe handling:	Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation at places where dust is formed.		
	Read and understand the manufacturer's instruction and the precautionary label on the product. Refer to Lincoln Safety Publications at www.lincolnelectric.com/safety. See American National Standard Z49.1, "Safety In Welding, Cutting and Allied Processes" published by the American Welding Society, http://pubs.aws.org and OSHA Publication 2206 (29CFR1910), U.S. Government Printing Office, www.gpo.gov.		
Conditions for safe storage, including any incompatibilities:	Store in closed original container in a dry place. Store away from incompatible materials. Store in accordance with local/regional/national regulations.		

# 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

## **Control Parameters**

# Occupational Exposure Limits: US

Chemical Identity	Туре	Exposure Limit Values	Source
Iron	TWA	10 mg/m3	US. ACGIH Threshold Limit Values

Appropriate Engineering Controls **Ventilation:** Use enough ventilation, local exhaust at the arc, or both to keep the fumes and gases from the worker's breathing zone and the general area. Train the welder to keep his head out of the fumes. **Keep exposure as low as possible.** 

# Individual protection measures, such as personal protective equipment

General information:	Exposure Guidelines: Threshold Limit Values (TLVs) and Biological Exposure Indices (BEIs) are values published by the American Conference of Government Industrial Hygienists (ACGIH). ACGIH Statement of Positions Regarding the TLVs® and BEIs® states that the TLV-TWA should be used as a guide in the control of health hazards and should not be used to indicate a fine line between safe and dangerous exposures. See Section 10 for information on potential fume constituents of health interest. Threshold Limit Values are figures published by the American Conference of Government Industrial Hygienists. Maximum Fume Exposure Guideline <sup>™</sup> (MFEG) <sup>™</sup> for this product (based on content of Chromium (VI)) is 0.1 mg/m3. This exposure guideline is calculated using the most conservative value of the ACGIH TLV or OSHA PEL for the stated substance.
Eye/face protection:	Wear helmet or use face shield with filter lens shade number 12 or darker for open arc processes. No specific lens shade recommendation for submerged arc processes. Shield others by providing screens and flash goggles.
Skin Protection Hand Protection:	Wear protective gloves. Suitable gloves can be recommended by the glove supplier.
Other:	<b>Protective Clothing:</b> Wear hand, head, and body protection which help to prevent injury from radiation, sparks and electrical shock. See Z49.1. At a minimum this includes welder's gloves and a protective face shield, and may include arm protectors, aprons, hats, shoulder protection, as well as dark substantial clothing. Wear dry gloves free of holes or split seams. Train the welder not to permit electrically live parts or electrodes to contact skin or clothing or gloves if they are wet. Insulate yourself from the work piece and ground using dry plywood, rubber mats or other dry insulation.
Respiratory Protection:	Keep your head out of fumes. Use enough ventilation and local exhaust to keep fumes and gases from your breathing zone and the general area. An approved respirator should be used unless exposure assessments are below applicable exposure limits.
Hygiene measures:	Do not eat, drink or smoke when using the product. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
	Determine the composition and quantity of fumes and gases to which workers are exposed by taking an air sample from inside the welder's helmet if worn or in the worker's breathing zone. Improve ventilation if exposures are not below limits. See ANSI/AWS F1.1, F1.2, F1.3 and F1.5, available from the American Welding Society, www.aws.org.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Steel rod with extruded flux coating
Physical state:	Solid
Form:	Solid
Color:	No data available.
Odor:	No data available.
Odor threshold:	No data available.
pH:	Not applicable
Melting point/freezing point:	No data available.
Initial boiling point and boiling range:	No data available.
Flash Point:	Not applicable
Evaporation rate:	Not applicable
Flammability (solid, gas):	No data available.
Upper/lower limit on flammability or explosiv	e limits
Flammability limit - upper (%):	No data available.
Flammability limit - lower (%):	No data available.
Explosive limit - upper (%):	No data available.
Explosive limit - lower (%):	No data available.
Vapor pressure:	Not applicable
Vapor density:	Not applicable
Relative density:	No data available.
Solubility(ies)	
Solubility in water:	No data available.
Solubility (other):	No data available.
Partition coefficient (n-octanol/water):	No data available.
Auto-ignition temperature:	No data available.
Decomposition temperature:	No data available.
Viscosity:	Not applicable

# 10. STABILITY AND REACTIVITY

Reactivity:	The product is non-reactive under normal conditions of use, storage and transport.
Chemical Stability:	Material is stable under normal conditions.
Possibility of Hazardous Reactions:	No data available.
Conditions to Avoid:	Avoid heat or contamination.

Incompatible Materials:

Hazardous Decomposition Products: No data available.

Welding fumes and gases cannot be classified simply. The composition and quantity of both are dependent upon the metal being welded, the process, procedure and electrodes used. Other conditions which also influence the composition and quantity of the fumes and gases to which workers may be exposed include: coatings on the metal being welded (such as paint, plating, or galvanizing), the number of welders and the volume of the worker area, the quality and amount of ventilation, the position of the welder's head with respect to the fume plume, as well as the presence of contaminants in the atmosphere (such as chlorinated hydrocarbon vapors from cleaning and degreasing activities.)

When the electrode is consumed, the fume and gas decomposition products generated are different in percent and form from the ingredients listed in Section 3. Decomposition products of normal operation include those originating from the volatilization, reaction, or oxidation of the materials shown in Section 3, plus those from the base metal and coating, etc., as noted above. Reasonably expected fume constituents produced during arc welding include the oxides of iron, manganese and other metals present in the welding consumable or base metal. Hexavalent chromium compounds may be in the welding fume of consumables or base metals which contain chromium. Gaseous and particulate fluoride may be in the welding fume of consumables which contain fluoride. Gaseous reaction products may include carbon monoxide and carbon dioxide. Ozone and nitrogen oxides may be formed by the radiation from the arc.

# 11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure		
Ingestion:	Health injuries from ingestion are not known or expected under normal use.	
Inhalation:	Potential chronic health hazards related to the use of welding consumables are most applicable to the inhalation route of exposure. Refer to Inhalation statements in Section 11.	
Skin Contact:	Arc rays can burn skin. Skin cancer has been reported.	
Eye contact:	Arc rays can injure eyes.	

## Symptoms related to the physical, chemical and toxicological characteristics

Inhalation:

Short-term (acute) overexposure to welding fumes may result in discomfort such as metal fume fever, dizziness, nausea, or dryness or irritation of nose, throat, or eyes. May aggravate pre-existing respiratory problems (e.g. asthma, emphysema). Long-term (chronic) overexposure to welding fumes can lead to siderosis (iron deposits in lung), central nervous system effects, bronchitis and other pulmonary effects. Respiratory exposure to the crystalline silica present in this welding electrode is not anticipated during normal use. Respiratory overexposure to airborne crystalline silica is known to cause silicosis, a form of disabling pulmonary fibrosis which can be progressive and may lead to death. Crystalline silica is on the IARC (International Agency for Research on Cancer) and NTP (National Toxicology Program) lists as posing a cancer risk to humans.

## Information on toxicological effects

#### Acute toxicity (list all possible routes of exposure)

Oral Product: Specified substance(s): Iron Limestone Fluorides (as F) Sodium silicate Copper and/or copper alloys and compounds (as Cu) Zircon	Not classified LD 50 (Rat): 98.6 g/kg LD 50 (Rat): 6,450 mg/kg LD 50 (Rat): 4,250 mg/kg LD 50 (Rat): 1.1 g/kg LD 50 (Rat): 481 mg/kg LD 50 (Rat): 3,200 mg/kg

In vivo Product:	Not classified
Reproductive Toxicity Product:	Not classified
Specific Target Organ Toxic Product:	ity - Single Exposure Not classified
Specific Target Organ Toxic Product:	ity - Repeated Exposure Not classified
Aspiration Hazard Product:	Not classified
Other Effects:	Organic polymers may be used in the manufacture of various welding consumables. Overexposure to their decomposition byproducts may result in a condition known as polymer fume fever. Polymer fume fever usually occurs within 4 to 8 hours of exposure with the presentation of flu like symptoms, including mild pulmonary irritation with or without an increase in body temperature. Signs of exposure can include an increase in white blood cell count. Resolution of symptoms typically occurs quickly, usually not lasting longer than 48 hours.

# Additional toxicological Information under the conditions of use:

Symptoms related to the physical, chemical and toxicological characteristics under the condition of use Inhalation: Specified substance(s): Manganese Overexposure to manganese fumes may affect the brain and central nervous

Overexposure to manganese fumes may affect the brain and central nervous system, resulting in poor coordination, difficulty speaking, and arm or leg tremor. This condition can be irreversible.

Chromium (VI)	Chromates may cause ulceration, perforation of the nasal septum, and severe irritation of the bronchial tubes and lungs. Liver damage and allergic reactions, including skin rash, have been reported. Asthma has been reported in some sensitized individuals. Skin contact may result in irritation, ulceration, sensitization, and contact dermatitis. Chromates contain the hexavalent form of chromium. Hexavalent chromium and its compounds are on the IARC (International Agency for Research on Cancer) and NTP (National Toxicology Program) lists as posing a cancer risk to humans.
Nickel	Nickel and its compounds are on the IARC and NTP lists as posing respiratory cancer risk, and are skin sensitizers with symptoms ranging from slight itch to severe dermatitis.

Other Adverse Effects:	Very toxic to aquatic organisms. Toxic to aquatic organisms.

13.	DISPOSAL	CONSIDERATIONS
-----	----------	----------------

General information:	The generation of waste should be avoided or minimized whenever possible. When practical, recycle in an environmentally acceptable, regulatory compliant manner. Dispose of non-recyclable products in accordance with all applicable Federal, State, Provincial, and Local requirements.
Disposal Instructions:	Discharge, treatment, or disposal may be subject to national, state, or local laws. Do not allow to enter drains, sewers or watercourses. Disposal of this product may be regulated as a Hazardous Waste. The welding consumable and/or by-product from the welding process (including, but not limited to slag, dust, etc.) may contain levels of leachable heavy metals such as Barium or Chromium. Prior to disposal, a representative sample must be analyzed in accordance with US EPA's Toxicity Characteristic Leaching Procedure (TCLP) to determine if any constituents exist above regulated threshold levels. Discard any product, residue, disposable container, or liner in an environmentally acceptable manner according to Federal, State and Local Regulations.

# **15. REGULATORY INFORMATION**

Canadian Controlled Products	This product has been classified according to the hazard criteria of the
Regulations:	Canadian Controlled Products Regulations, Section 33, and the MSDS
-	contains all required information.

## **US Federal Regulations**

# US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

None present or none present in regulated quantities.

#### CERCLA Hazardous Substance List (40 CFR 302.4):

Reportable quantity: 5000 lbs.
Reportable quantity: 100 lbs.
Reportable quantity: Included in the regulation but with no data values.
See regulation for further details.
Reportable quantity: 5000 lbs.

## Superfund Amendments and Reauthorization Act of 1986 (SARA)

#### **Hazard categories**

Х	Acute (Immediate)	Х	Chronic (Delayed)		Fire		Reactive		Pressure Generating
---	-------------------	---	-------------------	--	------	--	----------	--	---------------------

# SARA 302 Extremely Hazardous Substance

None present or none present in regulated quantities.

Chemical Identity		RQ			
Chromium and chromium		5000 lbs.			
alloys or compounds (as Cr)					
Nickel		100 lbs.			
Manganese		Included in the regulation but with no data values. See regulation for

# Clean Water Act Section 311 Hazardous Substances (40 CFR 117.3)

None present or none present in regulated quantities.

Revision Date: 03/24/2015

### Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130): None present or none present in regulated quantities.

#### **US State Regulations**

## US. California Proposition 65

Titanium dioxide	Carcinogenic.
Nickel	Carcinogenic.
Quartz	Carcinogenic.

**WARNING:** This product contains or produces a chemical known to the State of California to cause cancer and birth defects (or other reproductive harm). (California Health & Safety Code Section 25249.5 et seq.)

#### US. New Jersey Worker and Community Right-to-Know Act

Inventory Statuce

In	ventory Status: Canada DSL Inventory List:	One or more components are not listed or are exempt from listing.
	EINECS, ELINCS or NLP:	On or in compliance with the inventory
	Japan (ENCS) List:	One or more components are not listed or are exempt from listing.
	China Inv. Existing Chemical Substances:	One or more components are not listed or are exempt from listing.
	Canada NDSL Inventory:	One or more components are not listed or are exempt from listing.
	Philippines PICCS:	One or more components are not listed or are exempt from listing.
	US TSCA Inventory:	One or more components are not listed or are exempt from listing.
	Japan ISHL Listing:	One or more components are not listed or are exempt from listing.
	Japan Pharmacopoeia Listing:	One or more components are not listed or are exempt from listing.
	Australia AICS:	One or more components are not listed or are exempt from listing.
	Korea Existing Chemicals Inv. (KECI):	One or more components are not listed or are exempt from listing.
	New Zealand Inventory of Chemicals:	One or more components are not listed or are exempt from listing.

# 16. OTHER INFORMATION

#### **Definitions:**

The Maximum Fume Exposure Guideline<sup>™</sup> (MFEG)<sup>™</sup> is a guideline limit for total welding fume exposure for a specific consumable product which may be used by employers to manage worker exposure to welding fume where that product is used. The MFEG<sup>™</sup> is an estimate of the level of total welding fume exposure for a given product above which the exposure limit for one of the fume constituents may be exceeded. The exposure limits referenced are the American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV®) and the U.S. OSHA Permissible Exposure Limit (PEL) whichever limit is lower. The MFEG<sup>™</sup> never exceedes 5 mg/m<sup>3</sup> which is the maximum recommended exposure limit for total welding fume. The MFEG<sup>™</sup> is intended to serve as a general guideline to assist in the management of workplace exposure to welding fume and does not replace the regular measurement and analysis of worker exposure to individual welding fume constituents.

**The Maximum Dust Exposure Guideline**<sup>™</sup> **(MDEG)**<sup>™</sup> is provided to assist with the management of workplace exposures where granular solid welding products or other materials are being utilized. It is derived from relevant compositional data and estimates the lowest level of total airborne dust exposure, for a given product, at which some specific constituent might potentially exceed its individual exposure limit. The specific exposure limits referenced are the American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV®) and the U. S. OSHA Permissible Exposure Limit (PEL), which ever value is the lowest. The MDEG<sup>™</sup> is

never greater than 10 mg/m<sup>3</sup> as this is the airborne exposure guideline for total particulate (total dust). The MDEG<sup>™</sup> is intended to serve as a general guideline to assist in the management of workplace exposure and does not replace the regular measurement and analysis of worker exposure to individual airborne dust constituents.
