**ENGINEERING CONTROLS**: Proper ventilation **must** be maintained.

**VENTILATION**: Use enough ventilation, local exhaust at the work area, or both, to keep the fumes and gases below the TLV's in the workers breathing and the general area. Train the worker to keep his head out of the fumes. Monitor fume levels and do not exceed permissible exposure limits or values.

**RESPIRATORY PROTECTION**: Do NOT breathe fumes if heating this product or using it as a heat sink compound when welding, cutting or brazing. Use respirable fume respirator or air supplied respirator when welding or working in a confined space or where local exhaust or ventilation does not keep exposure below the TLV's.

EYE PROTECTION: Wear chemical safety goggles to protect against accidental contact.

**PROTECTIVE CLOTHING**: Wear chemical resistant gloves when using or prolonged contact with skin or repeated contact with skin is likely. Wear hand and body protection to prevent injury. See ANSI Z49.1.

**SKIN PROTECTION**: Individuals having sensitive skin may find it beneficial to use a barrier cream or moisturizer when excessive or prolonged contact with skin is likely.

**WORK HYGIENIC PRACTICES**: Professionally wash contaminated clothing before re-use. Food and drink should not be consumed or tobacco products used, nor cosmetics applied in area where exposures are possible.

**EXPOSURE GUIDELINES**: Use industrial hygiene monitoring equipment to ensure that exposure does not exceed applicable national exposure limits.

**EFFECTS OF OVEREXPOSURE** - brazing / thermal spraying / welding may create one or more of the following health hazards: **FUMES AND GASES** can be dangerous to your health.

**PRIMARY ROUTES OF ENTRY** is the respiratory system. Other possible routes are eyes, ingestion, and/or skin contact. **PREEXISTING** respiratory or allergic conditions may be aggravated in some individuals (i.e. asthma, emphysema).
